HARDY GAI NT CULTIVATED BLUEBERRIES

Not only does the blueberry produce big juicy berries 2 to 3 times as large as common blueberries, but it is ornamental on the lawn or in the shrubbery border and very easy to grow. The foliage is dark green, long and narrow, blossoms bell-shaped and pinkish white. During the autumn the leaves turn bronze, and during the winter months the twigs are red. The bushes will grow to the height of 8 feet.

For the best results plant on acid soil. Low muck or sand soils are usually very acid. Plant two or more plants to insure proper pollinization. If your soil is not acidity, mix the soil with our SPECIAL IMPORTED PEAT MOSS, see page 11. Set the plant and fill the hole with the same mixture and keep the soil moist.

GIANT BLUEBERRIES

Just Think! Giant berries, many three-fourth of an inch across. Plump and juicy, sweet and full-flavored. Mild enough to be included in any diet. Fresh ripe berries require no sugar, canned berries very little. Ideal for freezing and very delicious for pies. Every bush is a heavy producer, four bushes in your yard will provide enough berries for pies throughout the season.

RUBEL — Midseason to late. The bush is upright, very vigorous, hardy and productive. Ships well. Is a producer of large size fruit, and a heavy bearer.

RANCOCAS — Early to midseason. It is of excellent quality, and a very good shipper. The bush does not grow quite as tall as Rubel, but it produces a lot of fruit over a long picking season.

JERSEY — Midseason to late. Bushes grow upright, fruit is extra large and firm, good quality.

NOTICE — If your soil is not acid, see page 11 for a special Imported Peat Moss for this purpose.

FARMS**

WE ARE NURSERYMEN NOT DEALERS

When you order from us you are dealing direct with the grower. We are farmers, honest-to-goodness dirt farmers. We find it a pleasure to improve our methods as we go about our work satisfying our many customers.

It's our business to save you every cent we can on your nursery stock. It is also our business to send you the very best that can be grown. Another part of our business is to see that you are perfectly satisfied. We do not care how many plants you can get for a dollar, if they are not good, healthy, strong plants or if they do not reach you in good growing condition, you have not received your money's worth and you are not going to be satisfied, are you?

It is not the number of plants you get, but the quality of the plants that satisfies. Wouldn't you honestly rather have fewer choice plants for a dollar and be perfectly satisfied than to get more poor quality plants for a dollar and be bitterly disappointed? There's a mighty big difference between perfect satisfaction and bitter disappointment. When it comes to nursery stock, you can buy plants and trees at almost any price, but the stock that will produce the best results is the cheapest you can buy. It is always our aim to produce quality stock at the lowest price possible.

You are welcome to come and see us at any time, you may find us in our overalls pitching in right along with our help, but we will be more than glad to take off time to visit with you and show you around. We have no white collar men or desk engineers, everyone works at Zilke's.

IT IS EASY TO ORDER BY MAIL

Dear Friend Customer:

As this is our only salesman, we again take pleasure in coming to you with this small catalog of big nursery bargains. We again offer you the highest quality hardy northern grown stock at wholesale prices. Through these annual catalogs and your business with us we feel acquainted with you. Whether your order is for \$1.00 or \$50.00 it will receive our personal attention and you will get a square deal.

You probably will receive a great number of catalogs this spring, listing many varieties of fruit of every description, but just remember that the Zilke Nursery is offering only the best of each class, the kinds that produce the most and best crops or fruits, that thrive and show the most natural disease resistance. Every plant, tree, shrub, and bulb that we offer is State inspected and free from disease.

Varieties are an important consideration in planning either your fruit garden or your ornamental planting. Some of the old varieties are still in first rank, but many must give up their places to the newer and finer kinds. We urge you to give the new RED RICH, Jumbo and Armore Strawberries, Durham and Black Beauty Raspberries, Giant Red Grape and Paper Shelled Carpathian English Walnut a fair trial. We feel sure you will be more than pleased with the results.

Here at the Zilke Nursery we utilize every known scientific method of selection, breeding, production and protection in shipment that will insure your getting perfect plants in perfect condition, with strong, fibrous roots for quick, sure growth.

It will be our constant study in the future, as it has been in the past, to give perfect satisfaction to our old customers as well as our new ones who entrust their order with us. Our success, we feel confident, depends wholly on the satisfaction we may be able to give our customer friends.

Yours very truly,

BARTLETT

There's hardly a person that doesn't know the Bartlett Pear and its qualities, as is grown in, and is adaptable to all different climates, soils and situations. Fruit is large, golden yellow in color with a reddish blush on the sunny side. Flesh is tender and juicy, with a delicious musky aroma. Trees are vigorous, attain large size, bear young, live long, and barring frosts or freezes, they bear full crops year after year. Justly the leading commercial Pear—a leader among canning Pears. Fruit ripens early September. Prices above.

KIEFFER

One of the largest best known Pears. One of the best canning varieties and is possibly planted in more home orchards than any other variety. One of the easiest Pears to grow, less subject to blight than many varieties, strong grower, early and prolific bearer. Golden background, with a red blush. Recommended not only for the home orchard, but for the local market and roadside stands. Ripens in late October, heavy yielders. For Prices See Top of page. Not available in the 7/16 to 9/16 size, or 9/16 to 11/16 size.

NEW BOSC

A popular variety, and one of the best winter varieties. Fruit of artistic long-necked shape, golden russet color, with juicy, white flesh. Can be kept in storage for use during the holidays. Trees are rather small-growing, but heavy yielders. For Prices See Top of Page.

NEW SEEDLESS PEAR

The Pear without a fault! No seeds, no core, no waste! Solid fruit all the way through. Resembles Bartlett in appearance, but ripens 10 days later, producing its crop at a time when the market is not "glutted", thereby bringing highest prices. Thrifty grower, heavy bearer, blight resistant, grows on any soil. For Prices See Top of Page. Not available in the 7/16 to 9/16 size.

SWEET CHERRIES

SCHMIDT'S BIGGAREAU—The Black Giant of Sweet Cherries. A splendid market or home use cherry, because of its attractive and all around good qualities. Considered one of the very best of the Black Sweet Cherries. Delicious to eat, fresh and canned and very attractive. Fruit grows in large clusters. Keeps well and is an excellent shipper. In size it is very large, usually unsurpassed by any black sweet cherry. Bears fruit very young, hardy and a sure cropper. We recommend this variety very highly. For prices see top of page.

WINDSOR—One of the best quality dark cherries, often referred to as Black Oxhart. Has pinkish flesh and almost black skin. Large, juicy and firm. Delicious to eat, fresh and wonderful for canning. Used extensively for fancy preserving. Tree grows upright and is a rapid and vigorous grower. A good variety. PRICED ABOVE.

NAPOLEON (Royal Ann)—Of fine appearance and very largest size. Color yellow and amber, with bright red blush; flesh firm, juicy and delicious. Profitable for market, finding a ready sale, for canning and dessert. Ripens in July. For Prices See Top of Page. Not available in the 11/16 to 14/16 size.

SCHRECKEN BIGGAREAU—It is a large heart-shaped glossy black cherry, handsome in appearance. The flesh is melting but firmer than the early-ripening sweets, moderately sweet, and full of aromatic dark-colored juice. Ripens with Black Tartarian but is much larger in size and firmer flesh makes this variety much more valuable than Tartarian. The tree is vigorous and productive. For Prices See Top of Page. Not available in the 7/16 to 9/16 size.

NEW NOBLE—A dark-colored firm fleshed sweet cherry for market and home use. The fruit is large, heart-shaped, slightly flattened at the apex, dark purplish red, firm fleshed, and of very high quality, and seems to crack less than those of the late sweet varieties. We recommend this variety very highly as a choice late sweet cherry. For Prices See Top of Page. Not available in the 7/16 to 9/16 size.

DWARF FRUIT TREES

DWARF FRUIT TREES BEAR FULL SIZE FRUIT

The Dwarf Fruit Trees are especially adapted to the city or suburban home, where large-spreading standard size fruit trees are not wanted. They may be worked into the landscape planting wherever you would like to use a flowering tree, or they may be planted in the lawn. These are the true dwarf trees that you have been reading about in the leading magazines. Trees are budded on special roots so that they will never grow very large or tall. They are extremely decorative, especially at spring blooming time, can be pruned to desired height and shape. A beautiful sight in the spring, when aglow with blooms. These trees are dwarf in size only, they will bear full size fruit in great abundance.

DWARF APPLE TREES

Heavy 3 to 4 foot, \$3.00 each; 3 for \$8.25; 5 for \$12.50.

RED JONATHAN—Bright, solid red. Flesh white, sometimes tinted with red; firm, crisp and tender—a splendid family sort and highly profitable for market.

DOUBLE RED DELICIOUS—The fruits are large, flesh fine grained, crisp, juicy, melting and really delicious. Tree hardy and a vigorous grower.

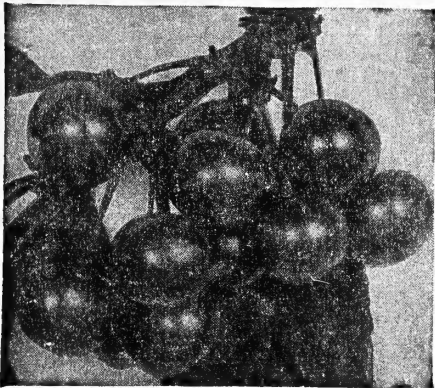

YELLOW DELICIOUS—Very best yellow apple. Waxy golden color. Luscious flavor, finest in the world. Bears fruit very young.

YELLOW TRANSPARENT—One of the very best early, yellow apples.

MC INTOSH—Fruit is large and has a good red color. Good for fresh fruit or cooking.

DWARF OKA CHERRY

The flesh color is a rich, intense purplish black red. It is in all a very remarkable fruit to look at and surely a delight to eat. Jelly and jam made from Oka Cherries are as deliciously sweet as they are beautiful to look at. The tree of Oka has a dwarf bushy habit

Dwarf Oka Cherry

and bears from the ground up. But the dwarf size in no way indicates the size of the crop of cherries, for the strength of the plant goes into fruit production and not into surplus tree growth, and so consequently the limbs and branches burden themselves with fruit. Plant 2 trees for perfect pollination, 2-yr. trees, 3 to 4-ft. tall, \$1.65 each.

DWARF BUSH CHERRY

Shapely, ornamental shrub, with long pointed gray-green leaves, silvery beneath. Covered with snow-white flowers in Spring. Cherries are in large clusters, easy to pick. Makes excellent jelly, jam and juice. The bushes reach a height of four to five feet and are perfectly hardy everywhere. You will find them beautiful and enjoyable. Bearing age plants \$1.25 each; 2 for \$2.00; 5 for \$4.00.

DWARF PLUMS

DWARF STANLEY PRUNE—This tree is also grown on a special dwarf, hardy rootstock. Seldom grows more than 6 to 8 feet tall. Bears young, very hardy. Fruits are large, bluish purple, very sweet, rich and fine. Excellent to eat fresh and best for canning. Ripens in September. Good 2 to 3 foot trees \$3.00 each; strong 3 to 4 foot trees, \$3.50 each; 4 to 5 foot trees, \$4.50 each.

DWARF SAPA PLUM—Fruit is purple outside and rich-red inside. Good size fruit, small pit. Can be grown in bush form. Very hardy. Produces young and regular. 2 yr. trees, 3½ to 5 ft. trees, \$1.75 each; 2 for \$3.00.

DWARF BARTLETT PEAR

The fruits of the Bartlett pear are large, waxy yellow with a red blush. Its fine white flesh is richly flavored, ideal for fresh dessert, canning, and summer storage.

These trees have been transplanted to develop extra heavy roots—your assurance of a quicker crop of fruits.

Strong 2 to 3 Foot Trees, \$1.75 each, 3 for \$4.50.

Truly a marvel among Peaches. Colors on the tree to a rich orange overspread with red, before ripening. Combines the large size and firmness of Hale with the perfect fertility of South Haven. Freetone. Ripens about two weeks earlier than Elberta. Trees grow rapidly, bear young, producing heavily, never failed a crop.

ELBERTA

There is no other peach which has ever attained the popularity of this variety. It is probably too well known for any lengthy description. However, it is roundish in shape, golden yellow skin with a slightly red blush on the cheek. It is very thickly skinned, which gives it its shipping qualities. It is a freestone and a self-pollinizer. Enormous producer.

REDHAVEN

Redhaven matures very early, about a month before Elberta. Fruit medium in size, of slightly elongated shape, and almost completely covered with a brilliant red color. Skin is smooth and tough. Flesh yellow, firm, fine textured, sweet, and of good quality. A perfectly fertile variety and freestone. Redhaven is the outstanding early peach.

AMBER GEM PEACH

Always in demand by canners, Huge in size, bright in color, tinged with yellow, flavor is sweet and very delicious. Ripens with Elberta, keeps well on the tree, excellent shipper, heavy producer. Clingstone.

NEW REDGLOBE PEACH

This new red peach ripens about 15 days before Elberta. The fruit is of good size, round, with light pubescence. The skin color is especially bright and attractive. At maturity about three-fourths of the skin surface is covered with a bright red blush over an attractive yellow ground color. The flesh is yellow, very firm, fine texture, and good flavor. Has proven very attractive as a frozen product. Redglobe trees are productive and vigorous, blossoms are large and self-fertile. Its most outstanding characteristics are its high skin color and its firmness of flesh. Redglobe should be well suited to long-distant shipment. Has been tested in California, Texas and South Haven, Michigan and is very promising.

Hansen Apricot

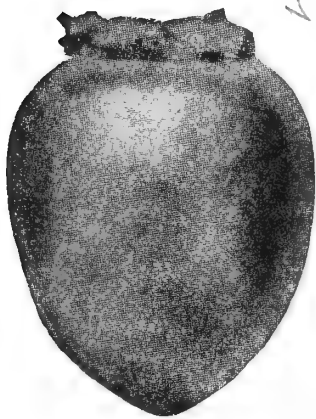

NEW HANSEN APRICOT

THE SUPER HARDY APRICOT

Hansen's new sensational Northwest hardy apricot. Recently introduced by Prof. N. E. Hansen, of South Dakota State College, who has been working for many years to produce hardy apricots that would be good eating and large size and still would withstand the rigors of Dakota's cold and drought. Two very important points of interest stand out in regard to these new apricots. One is that they are perhaps one of the most drought resistant of all trees, coming through the terrible droughts of 1933, 1934, and 1935 with flying colors—full foliage and no apparent effect whatever from the dry, hot weather, and with a great crop of fruit. The second point is that they are hardy almost anywhere in America, standing and bearing well in climates getting as low as 50 and 60 below zero. Prices: 2 to 3 foot \$1.00 each; 3 to 4 foot \$1.35 each; 4 to 5 foot trees \$1.70 each.

ORANGE QUINCE

Sometimes called Apple Quince. Fruit large, round with a short neck; color bright yellow; flesh tender, juicy and of excellent flavor. Highly regarded for jellies and preserves. Trees bear young. A good tree to plant on hillsides or where land is hard to work, as it requires very little care. Heavy transplanted 3 to 4 foot trees, \$1.75 each; 2 for \$3.25.

Persimmon

PERSIMMON TREES

Trees are thrifty growers, will bear fruit in several years. Grows into a small tree, makes a very beautiful and valuable ornamental tree for the garden, street or lawn. Fruit is large, with golden yellow skin, changing to almost red when fully ripe. Fruit will hang on the tree for several weeks after ripe and will keep its fine rich flavor. Transplanted 18 to 24 inch trees, \$1.00 each; 2 for

\$1.75. Transplanted 2 to 3 foot trees, \$1.75 each; 2 for \$3.25.

RUSSIAN MULBERRY TREES

An ideal shade tree, luxuriant foliage, clean and hardy everywhere, a rapid grower. Bears an abundant crop of edible fruits which resemble blackberries and are very sweet. A few Russian Mulberry trees will save your cherry crops as the birds prefer the Mulberry to Cherries. Transplanted 3 to 4 foot trees, \$1.00 each; 2 for \$1.75; 5 for \$4.00. 4 to 5 foot trees, \$1.25; 2 for \$2.25; 5 for \$5.00. Heavy 5 to 6 foot trees, \$1.65 each; 2 for \$3.00.

Paw Paw

PAW PAW - Northern Banana

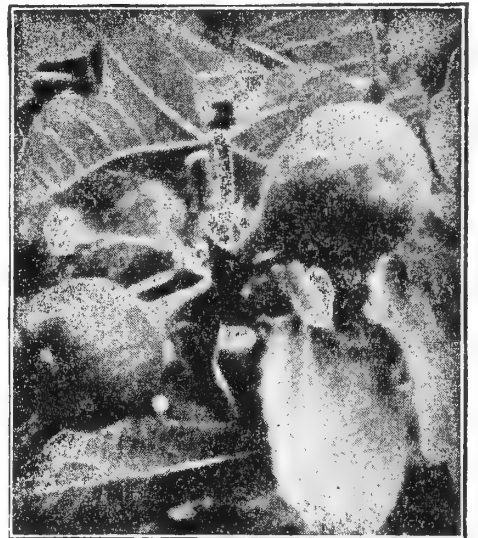

A small handsome tree with large purple flowers which are very beautiful and fragrant and large dark green foliage which make it a handsome tree for the park or lawn. Produce large yellow fruit which has the flavor and shape of the banana and is very delicious and attractive. Trees very hardy and productive. Can be grown in all sections of the United States. Should be planted in every lawn. 1½ to 2 ft. size, 75¢ each; 3 for \$1.95.

HARDY CHINESE DATES - Jujube

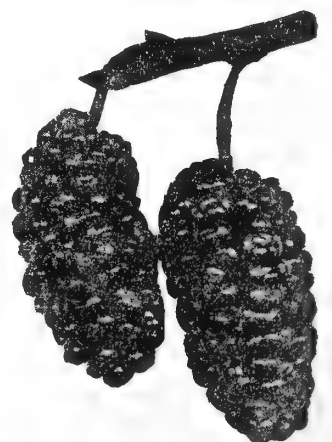

This variety of Hardy Chinese Date is a fruit from the high interior of China. It is quite hardy, the United States Department of Agriculture Bulletins reporting that it has withstood temperatures of 18 degrees below zero without injury. It is adapted to a wide range of territory and all kinds of soil. It blooms very late in the spring, after all danger of frost is past. The tree is a heavy and constant bearer and commences to bear at an early age. The chocolate-colored fruit is one to two inches long. It is delicious when eaten or cured like dates, and is excellent for preserves, jams and for most tasty and palatable confections. Transplanted 2 year 2 to 3 foot, \$1.95 each; 3 to 4 foot size, \$2.95 each; 4 to 5 foot size \$3.95.

DWARF EVERBEARING FIG Grow Your Own Large Sweet Figs

This new fig is fine for commercial as well as for home use, can be used as fresh fruit, canned or dried. The fig is large, straw colored, thin skin, yellowish pink meat, finest flavor, sweet, prolific. The skin rarely ever cracks. Ripens fruit over a long season, starting in August and still bearing heavy in October. If your temperature does not go much below zero in winter then cut fig limbs back to 10 inches high and cover remaining stubs with about 8 inches of dirt, a few leaves or straw will also help. Do this in the fall before frosts, remove protection in the spring after danger of frost is over. The fig plants grow very rapidly after protection is removed, often growing to a height of 7 feet in one season. The fruit is produced on the 1 year wood. Well rooted plants \$1.35 each; 2 for \$2.50; 5 for \$6.00.

HARDY DISEASE RESISTANT NUT TREES

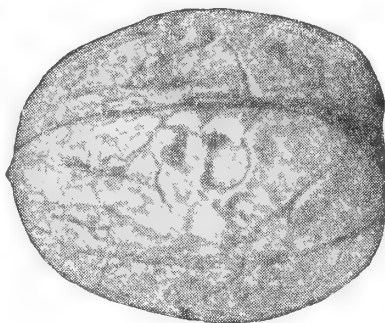

PAPER SHELLLED CARPATHIAN ENGLISH WALNUT

FAMOUS HARDY CORSAN STRAIN

This Hardy tree is growing in many parts of the world; the hardiest is found in Russia, Poland and Northern Carpathian mountains where the winter temperature at times drops to more than 40 degrees below zero.

It was from these countries that the original stock was brought to Canada about 20 years ago, and since then has been propagated in Michigan.

The trees have a gray colored skin, leaves are large, glossy and nicely scented. Nuts vary in size from that of the California English walnut to twice this size. Nuts fall free of hull. The shell is thin and breaks very easy. In Canada this variety is a heavy producer, grows rapidly, bears at an early age.

CHINESE BLIGHT RESISTANT CHESTNUT

GROWING YOUR OWN LARGE, SWEET CHESTNUTS IS A PLEASURE

A number of years ago the Chestnut blight destroyed the Native American Chestnuts. The U. S. Dept. of Agriculture—after many tests—introduced a type of Chinese Chestnut not only blight-resistant, but an early-bearer of large, good quality nuts. Trees start bearing when very young, often in 2 to 5 years, and succeed anywhere the American Sweet Chestnut formerly grew; in fact they can be grown over a wider area and may be grown wherever Peaches thrive. We recommend planting in a well-drained, sunny location. Plant the Chinese Chestnut for attractive home ground shade trees and also reap a harvest of delicious, sweet nuts.

ZILKE'S NEW RED EVERBEARING RHUBARB

McDonald Rhubarb

ZILKE'S EVERBEARING MCDONALD RED RHUBARB — is the finest of all Rhubarb. The stalks are giant in size, twice as large as ordinary Rhubarb. Bright red color. Very tender and stays tender a long time. It has the richest flavor and also more sugar, therefore requires less sweetening when cooked. It makes the finest Rhubarb pies and sauce you ever tasted. The skin is a bright red, but the inside flesh is white, so when the sauce is cooked it has just enough tinge of red to make it look appetizing. It is a tremendous yielder, that is why we call it everbearing, because as fast as you pull one stalk another comes up to take its place. You can use it over a much longer period of time than ordinary Rhubarb. The stalks are 18 to 24 inches long, many half as thick as your wrist. Nothing you can plant in your garden will give you more returns than McDonald Rhubarb. We recommend it very highly, not only because it is healthful, but because it tastes so good. Lasts a life time. Heavy 2 year divisions, 75¢ each; 3 for \$1.80; 10 for \$5.50.

SAGE — A perennial herb that is indispensable for seasoning meats and poultry stuffing, sausage, etc. Plants are hardy and will grow for years without replanting, 2 year plants, 30¢ each; 3 for 80¢, Postpaid; 6 for \$1.50, Postpaid.

CHIVES — A hardy onion-like plant that grows each year without replanting. Fine for seasoning salads, etc. 2 year plants, 30¢ each; 3 for 80¢, Postpaid; 6 for \$1.50, Postpaid.

New Paradise Asparagus

**MATURES A YEAR EARLIER—PLANT THIS SPRING
HARVEST FIRST CROP NEXT YEAR!**

For this year we offer this wonderful new variety from the market gardens of California—where only the best is grown. Again we predict that within a very short time Paradise will have supplanted all other kinds, and will be the standard market and commercial variety in all sections. It is similar in appearance to Mary Washington, and was developed as a sport of that variety by an Asparagus grower in Southern California. Stems are large, same color as Mary Washington.

The opportunities for a quick profit from Paradise are now greater than ever before. With America calling for increased production of all food stuffs, canners are demanding greater and greater supplies. Paradise fully meets their requirements, being especially suitable for both canning and freezing under new process.

The Thornless is as hardy, rugged and heavy bearing as its parent the Boysenberry. Vines grow long, and this pretty apple-green vine loaded with giant purple beauties is a sight you will never forget, and after you taste a handful of them, other berries will go begging for a while. Delicious with cream and sugar, and when made into jam, it's the last word.

ZILKE'S NEW 'BLACK BEAUTY' EVERBEARING BLACK RASPBERRY

You may have heard of
EVERBEARING STRAWBERRIES
OR
EVERBEARING RED RASPBERRIES
or perhaps, even,
EVERBEARING BLACKBERRIES

But have you ever heard of EVERBEARING BLACK RASPBERRIES? Well it's here now, ZILKE'S HAVE IT, and it's really a BLACK BEAUTY.

The Black Beauty Everbearing Raspberry ripens early, it starts to ripen with the well known Early Logan variety, after the summer crop is picked. Black Beauty begins producing on the tips of the new canes and side branches. Black Beauty not only has fruit on the tips of the new wood, it develops side branches, which are also helps in extending the fruiting season. Black Beauty starts with the earliest black raspberry and from there on in until fall or freezing weather it has ripe berries, green berries and blossoms all at the same time.

BLACK BEAUTY IS VERY HARDY

This new Black raspberry was found in the high altitude of West Virginia. Its origin at this high altitude would assure its being winter hardy and capable of thriving throughout the northern part of our country. We have fruited Black Beauty in the state of Michigan for the last four years, without winter injury to the plant or the crop.

BERRIES ARE GOOD IN SIZE AND QUALITY

The summer crop of berries are about the size of Cumberland, the fall or everbearing crop is larger than Cumberland or Logan. The canes are very vigorous and productive. Most of the berries are about $\frac{3}{4}$ of an inch in diameter when ripe. The fall crop is larger in size than the summer crop. Price: 1 year No. 1 plants, 6 for \$3.50; 12 for \$6.00; 25 for \$11.45; 50 for \$20.45; 100 for \$38.00. FOR BEARING AGE PLANTS See Page 22.

THE DOCTOR—This is considered by many to be the most beautifully colored of all roses. The long, pointed buds open into simply enormous, yet graceful blooms, so fragrant that you can detect them many yards away. It is a pink with a life, an iridescence, a sheen that is beyond description. Each flower is so perfect, so gorgeous, that you will consider it almost priceless. It is far more beautiful than can be described.

AMI QUINARD—A variety which is here to stay, beats all others; best near black Rose in our estimation. Deep velvety crimson, fragrant and very lasting. A vigorous shrubby plant, with almost single flowers of deep blackish scarlet.

PRES. HOOVER—A glorious combination of cerise-toned orange, scarlet and yellow. Richly perfumed, long stemmed and free blooming. One of the most beautiful roses ever introduced.

LUXEMBURG—An old variety, but one of the finest very bright yellow. A robust, easy growing, free-flowering Rose. Bright copper-yellow with graceful slim buds. Profuse bloomer, strong grower.

CONDESA DE SASTAGO—It is the first fully double variety to carry the vivid color of coppery red and yellow. Very hardy, vigorous, healthy growth. Has rich raspberry perfume. Keeps well when cut for indoor enjoyment.

BETTER TIMES—Brilliant red flowers, large, double, fragrant.

RADIANCE, PINK—The great American pink rose. Planted everywhere because it has made good all over America. The fragrant flowers are produced abundantly all season.

GOLDEN RAPTURE—Beautifully formed long-lasting buds, fully double blooms of rich yellow on long, strong stems. Vigorous grower. Delightful fragrance. The perfect yellow rose.

ETOILE DE HOLLANDE—Large, velvety crimson flower produced in great profusion throughout summer. Deliciously perfumed. Vigorous upright grower. An excellent red Rose.

EDITOR MCFARLAND—The perfectly formed flowers are clear brilliant, unfading pink, and as a cut flower it retains its form and lasts longer than any other Rose we know. A winner of many awards. The growth is vigorous, the foliage healthy, and it blooms all the time from early summer to frost.

CRIMSON KING—The color is a deep crimson in its perfect form, large in size and fragrant.

RED RADIANCE—Cerise-red. A sport of Radiance, it has the same form, habit of growth, fragrance, and healthy foliage. The difference is in the color, which is an even shade of cerise-red. Like Radiance it is long lived, free blooming and does well under a wide variety of growing conditions.

COUNTESS VANDAL—Beautiful pink, copper, gold and salmon color combination; long pointed buds, strong stems.

POINSETTIA—One of the most brilliant scarlet Roses we know of. The true poinsettia color. Bush is sturdy and hardy and a good grower. Buds are long, borne in abundance and open slowly into gorgeous blooms.

K. A. VICTORIA—This is the favorite and the best white rose for the middle west. Buds and flowers glistening, snowy white. Foliage exceptionally shiny and clean, seems to bloom much longer than any other hybrid tea.

MCGREDY'S SCARLET—A wonderful rose, beautiful in the garden and fine for cutting. The large flowers of luminous carmine-red are produced generously from spring until frost.

TALISMAN—Its brilliant orange-red buds open to large, fragrant, high-pointed blooms of glowing golden yellow stained with copper-red and orange-rose on inside of petals. As the petals unfold, they become bright apricot-gold, deep rose-pink or old rose, and unlike most Roses, the color becomes brighter as the flowers develop. Plants are vigorous, healthy and hardy growers.

CALEDONIA—The exquisite long buds of ivory change to purest white as the flowers open into large, double blooms of satiny texture.

BRIARCLIFF—A bright, clear shade of rose-pink. A high pointed center with exceptionally perfect flowers, sweetly scented. A vigorous, hardy grower. Dark, rich foliage, resistant to mildew.

GOLDEN CHARM—A delightful golden colored Rose which is sturdy in growth, very hardy, and produces great numbers of blooms each year. Buds are long and open into beautiful, richly scented blooms.

PICTURE—We consider this one of the very finest pink roses in existence, a clear pink with just a trace of salmon to give it a warm glow. Delightfully fragrant. The blooms are perfect in bud and when open. Very vigorous plant which blooms continuously.

SOEUR THERESE—Long, pointed buds are chrome-yellow, heavily marked with carmine; the open flower is rich daffodil-yellow and holds its color well. Sweetbriar fragrance. Blooms come freely on splendid cutting stems.

NEW "MORaine" LOCUST

Plant Pat. No. 836

THORNLESS, SEEDLESS, HARD WOOD.
FAST GROWING, LONG LIVED

America's Great New Shade Tree

The perfect answer to the demand for a clean, fast-growing, long-lived shade tree.

The MORaine LOCUST is a round headed tree when young but tall and vase-shaped when older. Mature trees attain a height of 80 to 100 feet with lower branches high enough to clear a two story house. This feature permits planting the tree closer to the house than is the case with most other trees. Leaflets are small and in the fall they drift in between the grass blades on the lawn making very little raking or clean up. Very little pruning is needed as the lower limbs self prune as the tree grows. Tests show this new tree to grow more rapidly than either Silver Maple or Chinese Elm. It withstands drought and heat and cold. Thrives under adverse city conditions as well as on the plains where rainfall is slight. Excellent for either lawn or street planting. One of the best new tree introductions for American homes. 4 to 5 ft. trees, \$3.95 each; 2 for \$7.70; 5 to 6 ft. trees, \$4.50 each; 2 for \$8.50; 5 to 6 ft. branched trees \$5.50 each; 2 for \$10.00; branched 6 to 8 ft. trees \$7.00 each.

ZILKE'S HARDY FIELD GROWN PERENNIALS

There is a world of difference in perennial plants. Our perennials are big, transplanted, hardy plants that were grown in the fields in wide rows, with plenty of room for both tops and roots. Such plants naturally cost a great deal more to grow, but **THEY ARE WORTH MUCH MORE.** They live longer, grow better and bloom more freely.

RICH BLUE DELPHINIUM

Delphiniums bloom in early summer and fall, producing great abundance of graceful spikes that are ideal for cutting purposes. Blooms come in lovely, rich colors on strong stems. Our healthy field grown plants will bloom this year. 40¢ each; 3 for \$1.05, Postpaid.

BLEEDING HEART

A favorite in grandmother's garden a half century ago, it is equally popular today. Grows about 2 feet tall, in partial shade or in full sun. Attractive light green transparent foliage. Graceful heart-shaped red and white flowers on arching branches. 2 year clump plants, 80¢ each; 2 for \$1.50, Postpaid.

LILY OF THE VALLEY

One of the most beloved of all old-fashioned plants. Large ornamental, waxy green leaves, dainty stems bearing beautiful, tiny, bell-shaped florets. Richly scented. Excellent for beds in shady locations. 8 for \$1.00; 20 for \$2.00 POSTPAID.

Lily of the Valley

TRITOMA

(Red Hot Poker) — One of the flashiest and most showy of all the garden plants. Large, elongated cones of brilliant orange-red flowers borne on strong canes 2 to 3 feet high. Will do well on any soil and will bloom abundantly year after year. Get a few of these and enjoy their brilliant coloring. 2 yr. heavy, 40¢ each; 3 for \$1.00, Postpaid.

SHASTA DAISY, GIANT ALASKA

Few perennials can equal this for the astonishing number of cut flowers it will produce in June and July. Also attractive in the garden. Large, glistening white blooms with a golden center on long 2 foot stems, fine for cutting or bouquets. 50¢ each; 3 for \$1.35, Postpaid.

HIBISCUS

Truly the "show-boy" of the perennials. Shoots start each year from the ground and grow to a height of 4 to 6 feet. They then bear great numbers of giant bell-shaped blooms measuring six inches or more across. Rich in color and hardy as an oak. Wonderful for background subjects or for an informal high summer hedge. We offer you mixed colors, 3 for \$1.00; 10 for \$2.50, POSTPAID.

ZILKE'S HARDY CARNATIONS

Grow this favorite, fragrant, delicately beautiful flower in your garden. These hardy Carnations grow in the garden like any other outdoor perennial. They bloom freely in early summer and continue with some flowers later. Single flowers on long stems are ideal for cutting. Here are four of the best kinds in a wide color selection.

Crimson Beauty—red, Snow White—pure white, Triumph—rose pink, Golden Sun—clear yellow.

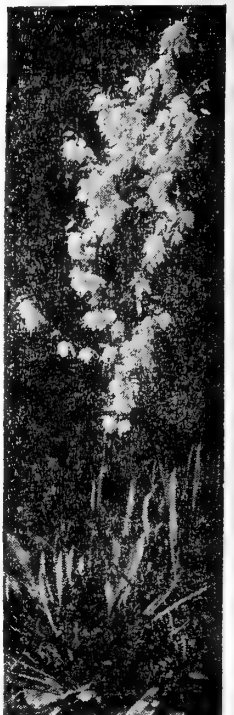

Strong field grown plants, 35¢ each; 4 for \$1.25, Postpaid.

DOUBLE HOLLYHOCKS

New double strain of an old garden favorite. Double Hollyhocks are one of the best background plants for your hardy border, in a corner against a wall, or as a mass of color that towers above all other garden subjects, as they will grow to 5 feet tall. These new larger double blooms and new hardiness make this a "must" in your garden. We offer you the following colors, Yellow, Pink, Red. 3 year Clumps for immediate effect, 65¢ each; 2 for \$1.00, POSTPAID.

SILVER KING

Lovely for foliage, a striking, silver leaved, contrast plant. A beautiful "mist" for setting off bouquets and floral combinations. A vigorous quick-growing plant with a close network of branches, fine stemmed and slender leaved. A necessity for flower arrangement. May be cut in the fall and dried for use in winter bouquets. 30¢ each, 5 for \$1.00, Postpaid.

Yucca

WHITE YUCCA

Its broad, sword-like foliage and tall, branched spikes of large, fragrant, drooping, creamy white flowers make it an effective plant for all positions. The foliage stays green the year around bringing it in the class of "ever-green". 2 yr. plants, 65¢ each; 3 for \$1.65, POSTPAID.

IMPROVED, RED ASTILBE

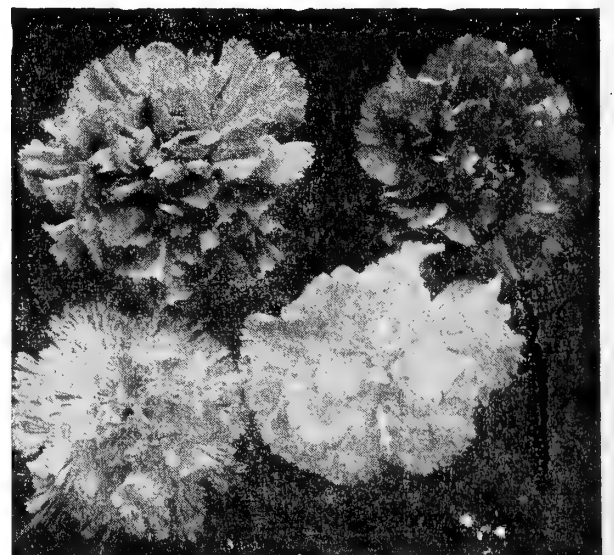

This brilliant red Hybrid Astilbe produces literally masses of plummy spires of fiery red. A fibrous root sends up enormous stems to a height of about 20 inches, each stem topped with a gorgeously colored plume of red. As roots age stems become more and more numerous and more flower plumes appear. 50¢ each; 3 for \$1.35; 10 for \$4.00, Postpaid.

IMPROVED, PURE WHITE ASTILBE

Has the same growing habits as the red variety, only that this variety is pure white instead of red. 50¢ each; 3 for \$1.35; 10 for \$4.00, Postpaid.
